INDEPENDENT DEVELOPMENT PROJECTS

- **Personal Site:** My digital resume. Used HTML, CSS, jQuery, jQueryUI, MVC, JavaScript, Bootstrap, and Responsive design. The website has links to my other projects.
- **StoreFront:** Created a secure application for managing product data. Application is built to simulate an online store front with a shopping cart. Administrators can manage product, category, and vendor data.
- **S.A.T. Scheduling Administration Tool:** Created a secure application for managing product data. Application is built to simulate an online class scheduling system. Administrators will have the ability to manage students, courses, scheduled classes, and enrollments.
- **FED1 Studio Project:** Created a website from scratch using only HTML and CSS. Website is built to for a small business that provides instructional courses.
- **Dungeon Application:** Created a dungeon application using C#. Created a class library that stored custom classes for the project: character, player and monster classes. Create methods to house the functionality for battle sequence, generates a new setting for the player. Created a loop that provides a menu of options and runs codes based on the player selection.
